

(FY2022-3Q) Financial Summary Video

Revised full-year forecast upward based on cumulative 3Q results, current conditions, and aggressive investment in each business to achieve record-high profits as early as possible in the next fiscal year and beyond

Vision Inc. Kenichi Sano President, Founder & CEO

The company reported net sales of 18,478 million yen, gross profit of 8,979 million yen, operating income of 1,949 million yen, ordinary income of 1,954 million yen, and net income attributable to owners of the parent of 1,270 million yen for the third quarter of the fiscal year ending December 31, 2022.

Factors contributing to the increase in operating income included the following in the Global WiFi business.

Outbound (travelers from Japan to overseas) usage gradually recovered due to the acceleration of the easing or elimination of entry restrictions in various countries around the world. Steady growth was achieved by capturing various domestic needs and promoting “Global WiFi for Biz,” a standby WiFi service for teleworking corporate customers. We also continued to be commissioned by airport offices to perform application verification services, which are part of the border control measures. The space management business (rental service of meeting rooms and telework spaces) increased due to the acquisition of Adval Corp. President Sano will give further details.
